

QA CHECKUP

Website Quality Assurance Audit

Report **SAMPLE** – for illustration purposes

CLIENT Lumen Interiors
WEBSITE lumeninteriors.com
AUDIT DATE July 2024
PREPARED BY hhexpress

QA Checkup — Find bugs before your customers do.

Executive Summary

OVERALL ASSESSMENT **Needs Improvement**

During this QA audit, the website was tested across key user journeys, navigation, forms, functionality and responsive behavior.

Findings

Severity	Number
Critical	0
High	2
Medium	5
Low	4
Total	11

Key observations

- 2 high-severity functional issues were identified.
- Several form validation issues were found.
- One mobile responsiveness issue affects the checkout page.
- No critical blocker was identified.

Testing Scope

Area	Tested
Homepage	✓
Navigation	✓
Registration	✓
Login	✓
Forms	✓
Search	✓
Product pages	✓
Shopping cart	✓
Checkout	✓
Mobile	✓
Links	✓

Environment

BROWSER Chrome

OS Windows

DEVICE Desktop / Mobile simulation

TEST TYPE Manual functional testing

Test Results

Area	Passed	Failed	Notes
Navigation	18	1	Broken link
Login	8	2	Validation issues
Forms	12	3	Error handling
Checkout	15	1	Mobile issue
Mobile	20	2	Layout problems

Bug Reports

Every bug found during the audit follows the same structure below, so your team can act on each one without back-and-forth. 3 of the 11 findings are shown here as examples.

BUG-001 HIGH	
title	Login error message is not displayed for invalid password
priority	High
environment	Chrome / Windows 11
steps	1. Open the login page.
	2. Enter a valid email address.
	3. Enter an incorrect password.
	4. Click Login.
expected	A clear error message should inform the user that the credentials are incorrect.
actual	The page reloads without displaying a clear error message.
evidence	Screenshot: BUG-001.png
recommendation	Display a clear and user-friendly validation message after an unsuccessful login attempt.

BUG-002 MEDIUM	
title	Newsletter signup field accepts invalid email formats
priority	Medium
environment	Chrome / macOS 14
steps	1. Scroll to the footer newsletter form.
	2. Enter an email without an @ symbol (e.g. "test").
	3. Click Subscribe.
expected	The form should reject the input and show a validation message.
actual	The form submits successfully with no validation, and no confirmation message appears.

evidence	Screenshot: BUG-002.png
recommendation	Add client-side email format validation and a visible confirmation state after submission.

BUG-003 LOW	
title	Product image overlaps price on small mobile screens
priority	Low
environment	Safari / iPhone SE (375px width)
steps	1. Open any product page on a 375px-wide viewport.
	2. Scroll to the product summary block.
expected	The product image and price should stack cleanly without overlapping.
actual	The price label is partially hidden behind the product image on the smallest supported screen width.
evidence	Screenshot: BUG-003.png
recommendation	Adjust the flex/grid breakpoint for the product summary block below 400px.

Recommendations

Based on the QA audit, we recommend prioritizing:

1. High priority

Fix the login validation issue because it directly affects the user authentication journey.

2. Medium priority

Improve form validation and error messages.

3. Mobile

Review the checkout layout on smaller screens.

Conclusion

The website is generally functional, but several issues should be addressed before the next release to improve reliability and user experience.
